

Reasons of happiness

Romanian Team

Nationality

There are many types of happiness in this world but none is as important as the joy of being a certain nationality, for us, it is the joy of being Romanian!

Every December 1st we celebrate the unification of our country, the happiest day for all our people!

The joy of a good deed

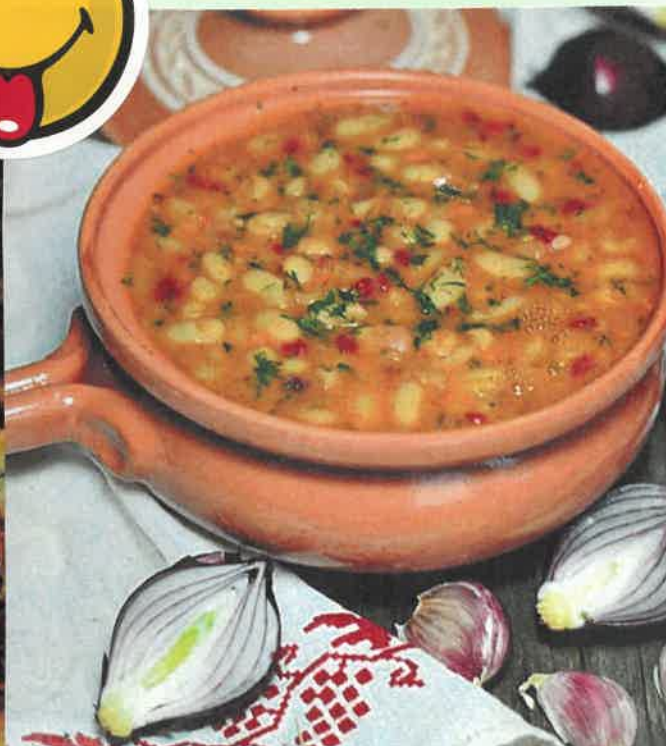

The joy of a good deed! It brings you happiness because you know you made someone's day better. As for yourself, it makes you very happy because you know that person cannot reward you, but who knows, maybe later life will give you a greater reward.

The joy of food

The joy you feel when you eat something you really like, something traditional or not, something you haven't eaten in a long time, is unreal. Although it is a simple thing, food is a well-founded reason for joy.

Free Time - our joy and happiness

Free time is that part of the day when you can relax. Most of Romanian children spend their free time reading or surfing the internet.

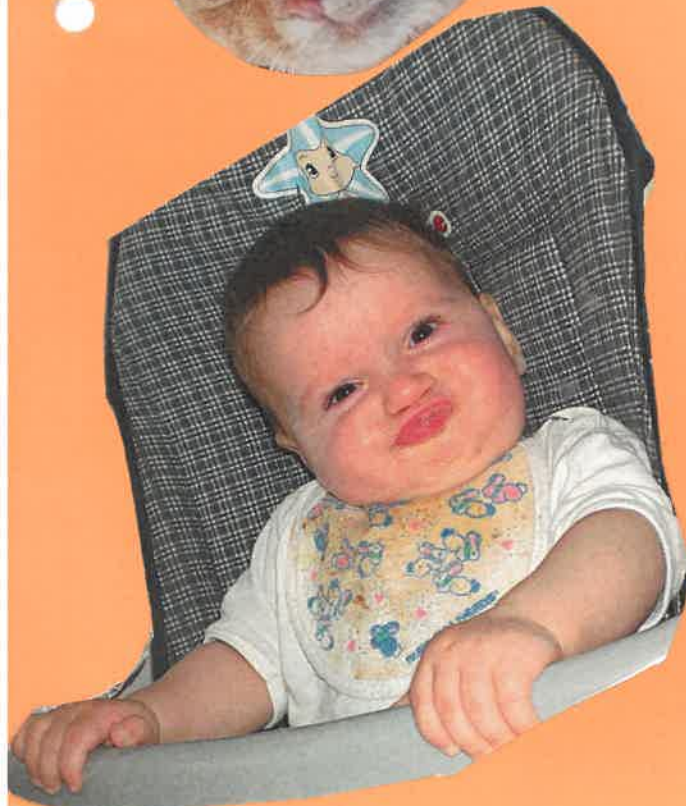

Even though it is important to study, it's good to have fun sometimes!

The joy of childhood

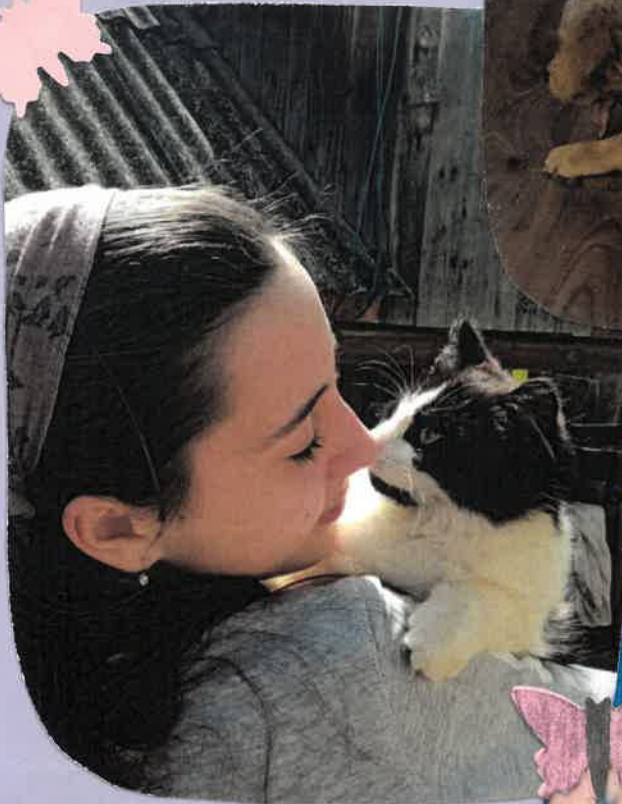

Childhood is the best part of your life: going on holidays, playing outside, playing with friends... It is full of happiness and friendship. Enjoy it while you still have time!

The joy of pets

The happiness when you arrive home, maybe sad or maybe cheerful and your pet is excited that you came back home. That moment your sadness is behind you and you fill up with its positive energy.

The joy of family

The Christmas and Easter evenings when we assemble to party, young and old, and enjoy one another cannot be described in words. That feeling when we gather together with our family and pets is unique!
